

# Healthcare Supply Chain EDI Health Check

## Improving Operational Efficiencies with EDI

EDI continues to prove its value by lowering costs and improving accuracy and business efficiency. Exchanging documents electronically improve transaction speed and visibility while decreasing the amount of money spent on manual processes. But for all of its power, EDI is underutilized across many healthcare organizations. Why is this?

- EDI is prone to problems having downstream impact on several other areas of operations including Purchasing, Inventory, and Accounts Payable.
- EDI, when not operating correctly, can cause PO's to not get transmitted, invoices to not get interfaced, and it takes significant buyer's and accounts payable staff's time to reconcile.
- EDI can be a major contributor to Received Not Invoiced (RNI) problems as invoices can be transmitted by the vendor but not matched into the Infor Lawson system due to setup issues.

## How ROI Can Help

ROI's Supply Chain experts can help diagnose where your EDI capabilities may not be delivering the efficiency and cost savings available.

We'll quickly assess your Infor Lawson EDI setup tables and provide a summary report inclusive of identification of errors, volume and type, and a ranking to help you prioritize areas of improvement including recommendations for ED40 clean-up.

### Get Started with this Complimentary EDI Health Check Today

By providing ROI output from key Infor Lawson EDI tables as well as a copy of your GPO report, we'll run this information through our custom tools and produce a detailed summary and recommendations report.

Next, we'll establish a call to review the information with your key stakeholders, discussing both your short and long term goals and help you choose the most cost-effective way of meeting those goals.

The result of the ROI Assessment is a summary report with prioritized opportunities for improvement. Whether you are upgrading EDI, trying to resolve complex errors, or just need a little training or support, we've done it and are eager to share what we've learned.

ROI **does not charge** for this health check which includes the analysis and output and there is no further obligation! To schedule your free assessment, simply e-mail us at [info@roihs.com](mailto:info@roihs.com)
