McKesson OneContent™ Upgrade Services

The Challenge

Is your organization struggling to get the OneContent upgrade completed due to a multitude of projects you have on your plate? Or are there other issues that have minimized the effectiveness of your implementation? If you find yourself in this position, ROI can help you with any of these issues and remove this burden from your staff.

The Right Knowledge

With over 15 years of working with McKesson solutions, we've seen nearly every configuration involved in a project scenario; this enables us to successfully deliver complex technology projects, small and large. Our objective is to earn the opportunity to be your trusted enterprise technology consulting advisor. Whether you're focused on a new implementation or an upgrade of your existing McKesson solution, ROI has the experience, skills, and resources to assist with all aspects of your project, from project management to go-live support. We tailor our services to what you need when you need it.

- US-based

Detailed Methodology

With a methodology honed over years of deploying McKesson Enterprise Content Management solutions, ROI consultants orchestrate the strategic planning, implementation, and support of your solutions. Our methodology guarantees you the strict standards when leading your project and, therefore, increases the likelihood of your success.

However, we also recognize that projects in different environments and of different types require variations of the basic Project Management principles and as such ROI will adapt its methodology to your needs and the demands of your project: whether you need some guidance in project management or a more detailed approach in order to implement new software, what matters is that you get the results you expect.

1 PLAN	2 DESIGN	3 BUILD	4 TEST	5 DEPLOY
Finalize Scope	Gap Analysis	Install Software	Integration Testing	Execute Cutover to Production
Timeline	Application Specifications	Configure Applications	Migration Validation	Environment Migration
Project Plan	Technical Specifications	Deploy OVA Templates	Performance Testing and Tuning	Performance Monitoring
Communication Plan	Data Migration Requirements	Migration & Storage	Go-Live Plan	Go-Live Support
Resource Plan	Security	Test Plans	Support Plan	Post Go Live Review and Transition
Training Plan	Test & Production Hardware	Training Materials	End User Training	
Technical Infrastructure	Workbooks	Functional Testing
